

The background features a gradient from light yellow at the top to dark purple at the bottom. It is decorated with various patterns: a gear-like structure of purple squares in the top left, a crowd of stylized human figures in the top right, a bar chart in the bottom left, and a laurel wreath in the bottom right. Scattered throughout are circular patterns resembling citrus slices, some in yellow and some in purple.

STRATEGY OF THE FEDERATION OF FINNISH LEARNED SOCIETIES 2024–2030

STRATEGY OF THE FEDERATION OF FINNISH LEARNED SOCIETIES 2024–2030

VISION

The Federation of Finnish Learned Societies is a major actor in science policy, promoting the vitality and diversity of the research community for the benefit of society.

MISSION

The Federation of Finnish Learned Societies brings together scientific societies and the research community to achieve both national and international impacts. It fosters and promotes learning and everyone's right to reliable research-based knowledge.

STRATEGIC PRIORITIES

- The research community influences decision-making
- Scientific knowledge is accessible in society
 - Research and assessment practices are responsible
- Our operations are accountable and build a sustainable future

Our values

Openness
Reliability
Independence
Community

Operating environments

Member societies
National community
International community

STRATEGIC PRIORITIES

The research community influences decision-making

- We anticipate societal changes and signals related to science and research policy
- We bring together independent research expertise from all disciplines
- Together with others, we advocate for science and research
- We raise awareness of the significance of volunteer operations of learned societies in society at large

Scientific knowledge is accessible in society

- We promote open access to researched knowledge and scientific publications
- We strengthen respect for researchers in society and the freedom of research
- We make scientific knowledge accessible to citizens
- We promote the multilingualism of scientific knowledge

Research and assessment practices are responsible

- We reform the evaluation culture in cooperation with the entire scientific and research community
- We create assessment practices that value ethics, openness, diversity, societal impact, and well-being at work
- We want the volunteer work and activities of researchers for the benefit of the research community and society to be rewarded
- We develop research community based assessment of publication channels, scientific quality and societal impact

Our operations are accountable and build a sustainable future

- We develop high quality member services
- We measure the performance of our operations and develop and manage them based on knowledge
- We invest in the competence and well-being of our personnel
- We act as a unified organisation, working for our common goals, and our organisational culture is future oriented
